FIGURE EXAMPLE (would look like this in your paper)

Beasts and monsters have long been a part of the human consciousness. A manticore, as seen below, shows up as the “sin of Fraud” (“Manticore” Wikipedia). **(This is the lead in/reference that should be in the text of your paper.)**

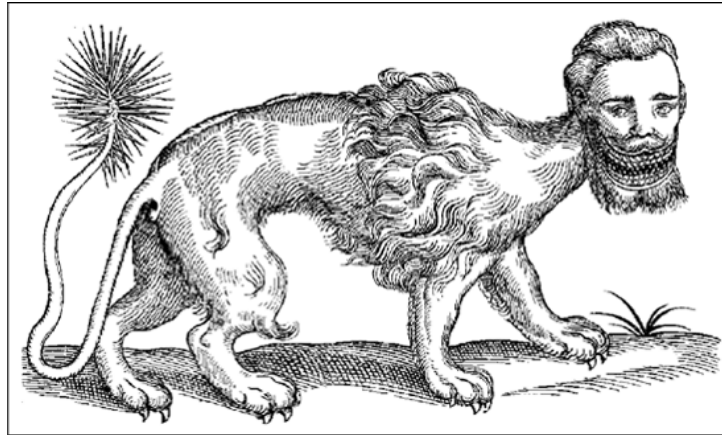

Fig. 1. Manticore, woodcut from Edward Topsell, *The History of Four-Footed Beasts and Serpents . . .* (London, 1658; 344); rpt. in Konrad Gesner, *Curious Woodcuts of Fanciful and Real Beasts* (New York: Dover, 1971; print; 8).

Often, beasts become symbols of human vices. After belief in the actual beast subsides, the symbol still holds a place in the human psyche. “the manticore became the symbol of tyranny, disparagement and envy, and ultimately the embodiment of evil. As late as the 1930s it was still considered by the peasants of Spain, to be a beast of ill omen” (“Manticore” Monstrous). It is for this reason that society must look towards its modern beasts in order to recognize modern symbols of avarice and greed. **(This is the other piece of bread—your explanation—as to why the information is important and how it connects to the thesis.)**

why is table to imp. paper

In order to compete in a global economy, however, the US must stress the importance of communicating in languages other than English. Hence, more ~~scholarship monies~~ must be made available to those studying the humanities.
